US Army Versus VA Disposition

- Army rates only conditions determined to be physically unfitting, compensating for the loss of a military career
- VA may rate any service-connected impairment, thus compensating for loss of civilian employability
- Army ratings are permanent upon final disposition
- VA rating may fluctuate with time, depending upon the progress of the condition
- Army disability compensation is affected by years of service and basic pay
- VA compensation is a flat amount based upon the percentage of rating received.

- Provides MTF access to real time and historical data
